Summary

Transitioning from a business analyst, with over 8 years of experience and currently part of an agile team, to a full stack developer is a natural progression in the pursuit of a more technical role in my career. Team work, Analytical and critical thinking, clear communication, focusing on the details while not losing sight of the vision are all skills that business analysts and developers share. I recently completed a rigorous 6 months coding boot camp from George Washington University where I learned multiple technologies.

Projects

DC Predatory Ticketing

Description: The nature of predatory traffic tickets in Washington DC

Technologies: Python

Git: https://github.com/carlykelly/Traffic_Project

FDI in Sub-Saharan Africa (Awarded 1st place)

Technologies: Python, JavaScript, HTML, CSS, MySQL, MongoDB, AWS, Plotly, Leaflet

Conflict in African (Awarded 1st place)

Description: exploring the drivers of conflict in Africa

Technologies: Python, JavaScript, HTML, CSS, MySQL, MongoDB, AWS, Leaflet, Tableau,

Plotly, Heroku, Machine Learning

Git: https://github.com/carlykelly/African_Conflict

Relevant Experience

Senior Business Analyst
American Chemical Society

2016 - Present
Washington DC

Part of an Agile team tasked with critically analyzing current business processes and the technological environment in order to highlight business inefficiencies and identify technological gaps. Leveraging Iterative analysis, consistent communication and transparency to build trust with business stakeholders and deliver ideal technological solutions.

- Identified divergent business processes across 3 business units when soliciting and assigning volunteers. This resulted in a strategic shift that saved 3 months of development time.
- Lead meetings, with developers and SME's, to evaluate multiple vendors across several categories. This resulted in selecting the ideal vendor who delivered a system that was positively received and widely used by the business.

- Developed detailed gap analysis that highlighted business process inefficiencies and areas for technical opportunities. This led to business process reengineering and the adoption of new systems.
- Delivered small to medium size projects as the Project Manager/Business Analyst. On time and with high quality that resolved 80% of business issues and saved 3 hours of work per week.

**Business Analyst & Quality Assurance
Sunrise Senior Living**

**2011-2016
McLean, VA**

Charged with business process analysis and requirements documentation, communicating with different technical stakeholders and in some projects charged with developing and implementing testing plans.

- Established visibility into requirements, their progression and priority by creating and managing a Requirements Traceability Matrix. This resulted
- Saved time and cost by identifying inconsistency in requirements.
- Built consensus around the business process used to collect and manage resident data in order to implement Microsoft Dynamics 365.
- Instrumental in maintaining communication and understanding between business stakeholders and the IT team.

Education

George Washington Data Analytics Certificate

- An intense 6 months program focused on teaching technical skills and concepts.

Georgia State University:

- BA in Finance
- BA in Risk Management
